

During these challenging times, myHHBS is adapting to continue providing essential therapy services. We've implemented rigorous COVID-19 safety measures, including providing our staff with masks, face shields, gloves, and sanitizer. Our therapy rooms are strictly limited to essential personnel, and visitors must undergo temperature checks, COVID screenings, and sanitize upon entry.

For those preferring to avoid in-home visits, we offer TeleHealth ABA Therapy. This remote service ensures consistent care and engagement for your child through technology. Many families are already benefiting from TeleHealth, appreciating its effectiveness.

Whether in-person or through TeleHealth, myHHBS remains committed to supporting your family during this pandemic.
